

ULTRALIFT™

High Performance Powered Hand Trucks

Ultra Lift supplies the power—so you don't have to. One person can safely and easily handle loads that usually require 2 or 3 people, even up or down stairs. Two people can handle most loads to 1500 pounds. If safety is your concern, **Ultra Lift** is the best move you'll ever make.

Operator Safety

Injuries can be virtually eliminated. **Ultra Lift** does the lifting so that operator effort required to complete a move is minimized. Heavy loads are broken back with ease. The operator stays in control by using a combination of motor power, balance, and leverage in every phase of the move.

Reduce Labor Costs

Fewer people are required for any move with **Ultra Lift**. Manpower can be scheduled more productively. Labor savings often pay for the **Ultra Lift** in one month.

Eliminate Damage

Loads are broken back, set down and moved under power with maximum leverage and operator control. Gentle handling eliminates bumps, bounces and damage to the load and premises.

Increase Profits

Increased operator safety, reduced labor cost and elimination of damage to the load and premises all contribute to significant increases in profits.

CALL FOR INFORMATION ON OTHER MODELS. MANY SPECIALTY APPLICATION MODELS, CUSTOM UNITS, AND ADDITIONAL ACCESSORIES ARE AVAILABLE.

ACCESSORIES:

Model VMA Vertical Move Assembly

- Deck, Caster Plate, Strap, and Strap Bar Post

The VMA solves many “tight” location moving problems by enabling installers to move large, heavy loads in an upright position. The floor space required to turn corners and negotiate landings is minimized. The load rolls easily on Ultra Lift’s main wheels and the VMA Caster Plate.

\$ 325.00

Model VMA-S Snack Machine Adaptor

- Magnetic Spacer Bar, Aluminum Inserts

The VMA-S consists of a magnetic Spacer Bar and aluminum Inserts that adapt the Model VMA for moving machines with legs. The Model LPE7 Lift Plate Extension is also required when moving large snack or food machines.

\$ 75.00

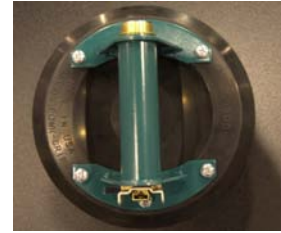

ACCESSORIES (continued):

Model VGH Vacuum Grip Handle

- Rigid Metal Construction; 8.0" Diameter Pad

The Model VGH can be attached quickly and easily to any flat, smooth, non-porous surface to provide a solid grip where you need it. It keeps hands clear of load edges on moves through doorways or narrow halls and simplifies turning, positioning and pulling loads when used with the VMA

\$125.00

Model SEH Strong Arm Extension Handle

- Handle, Top Switch, Duplicate Control Circuit

The Model SEH provides an extra foot of leverage, reducing the effort on stairs by half. Use the extra height to position yourself securely above unusually tall or heavy loads. A top mounted auxiliary switch provides ease of operation and control.

\$300.00

Model LPE7

- 7" x 34" Over Plate

The Model LPE7 is a lift plate extension that is used to move vending machines with legs that are over 27" apart. The LPE7 attaches directly to the standard lift plate and can be removed in seconds when not required.

\$125.00

Model PLE Portable Landing Extender

- Adds 33" to Small Landings

For use on landings where there is not enough space to set the load down safely and making a turn would be almost impossible. The Model PLE is particularly effective when used in combination with the Model VMA.
